

# Responsible and Compliant E-waste Recycling Solutions

---

Closing the loop on electronic waste

Because we care

# Upgrading your company's IT equipment and not sure what to do with your old hardware?

## We help you get rid of old IT equipment in a secure and environmentally friendly way

When your electronic devices are coming to an end of their life-cycle, an issue arises to properly recycle them. For an extremely long period of time, dumping e-waste into the landfill has been the usual practice of e-waste management.

Decades of wrong electronic waste disposal practices have filled sites with dangerous metals, polluting the surrounding soil and groundwater.

AST Recycling follows environmentally friendly e-waste disposal practices, in accordance with eWasa and the Institute of Waste Management of Southern Africa guidelines.

We take the burden of the e-waste disposal away from you by coming to you, collecting e-waste and recycling it at our recycling facility.

## How it works?

# 1

### Identification

We identify quantity, location and types of your IT equipment.

# 2

### Collection

Our team arranges collection at an agreed time from a confirmed address.

# 3

### Serialisation

We serialise the items at client's site or on our site for reporting purposes according to client requirements.

# 4

### Recycling

We dismantle and recycle all downstream fractions with registered and certified downstream vendors.

# 5

### Reporting

We provide transparent, accurate reporting via Certificate of Recycling with all relevant information including date, weight, and descriptions of items, as well as serial number lists depending on client needs.

# What do you get from it?

## Secure data sanitisation

We are specialists in data sanitisation, whereby we safely wipe all data so that equipment can be recycled without risk.

## Compliance

Our secure processes ensure that your company meets corporate and compliance mandates.

## Positive environmental impact

Recycling electronic devices ensures that they do not end up in landfill polluting environment and negatively impacting human health.

## Be part of a circular economy

As a business, zero waste to landfill means that you will be a part of a circular economy.

## Free certificates

We issue free Data Destruction and E-waste disposal certificates on request.

## Get paid to recycle

We pay you for every kilogram of electronic waste recycled. The more you recycle, the more money you are awarded.

## E-waste collection and recycling at no cost to you

We'll save you time and money by coming to your offices and collecting your old or unwanted electronic equipment.

# What are the next steps?

## Contact our team

Contact our highly experienced team to discuss your e-waste recycling requirements. Our services can be customised to suit the individual client's needs.

or

## Book your e-waste collection

Book your e-waste collection on our website [www.astrecycling.co.za](http://www.astrecycling.co.za)

It's that simple!

# Thinking to donate?

Many companies donate old computer equipment to their staff, or to charity and underprivileged communities. This carries a multitude of risks that they most likely are unaware of such as the regulations set out in the National Environment Waste Act. AST Recycling offers managed donations services to companies to ensure that no data is compromised and all regulatory compliance is adhered to. Contact us to find out more.

# Our Certifications

AST Recycling is ISO 9001, 14001, 27001 certified providers for E-Waste Recycling. Our local and international certifications demonstrate commitment to environment protection, employee safety and security procedures.
